Subject: RE: project 2002-070-00

TO WHOM IT MAY CONCERN:

As a property owner in Nez Perce County, Idaho, I wish to express my support for the Lapwai Creek watershed restoration (2002-070-00). Too many times the NW Power Council has terminated ongoing productive projects. Early termination basically wastes previously authorized funding leaving projects uncompleted or good biological data unused. This project needs funding through completion to insure water quality issues in the drainage are adequately addressed and actions fully implemented.

Thank you for the opportunity to comment and am looking forward to your positive approval.
