MEMORANDUM

TO: Council Members

FROM: Jennifer Light

SUBJECT: Status Report on Lower Snake River Dam Power Analysis Scope of Work Development

BACKGROUND:

Presenter: Jennifer Light and Ben Kujala

Summary: At the April 12, 2022 Power Committee meeting, staff presented a draft scope of work for the potential Lower Snake River Dam power analysis, along with stakeholder feedback and concerns on the work. The May 11 Power Committee meeting will provide an opportunity for a quick status update on the development of the scope of work and allow for any comments from committee members. Staff has not made any changes to this scope of work as proposed in April and considers it final, unless changes are requested by the Council.
