Subject: Update on governance of non-routine analytical functions of the Fish Passage Center

In this agenda item we will present a brief update on discussions with other regional entities on establishing some form of governing function for the Pacific Northwest National Laboratory's contract to provide "non-routine" analysis as part of the functions of the Fish Passage Center. The Council discussed potential scopes of governance for these functions at its February meeting. The Council approved the Chair and staff discussing such a role with others in the region.
