Report of Independent Auditors

To the Council Members
Northwest Power and Conservation Council

Report on the Financial Statements

We have audited the accompanying financial statements of Northwest Power and Conservation Council (the Council) which comprise the statements of financial position as of September 30, 2018 and 2017, and the related statements of activities and cash flows for the years then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Council's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Council's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Northwest Power and Conservation Council as of September 30, 2018 and 2017, and the changes in its fund balance and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matter

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The schedule of expenditures of federal awards and related notes to the schedule of expenditures of federal awards, as required by Title 2 U.S. *Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated, in all material respects, in relation to the financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 17, 2018 on our consideration of Northwest Power and Conservation Council's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of Northwest Power and Conservation Council's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Northwest Power and Conservation Council's internal control over financial reporting and compliance.

Moss Adams LLP

Northwest Power and Conservation Council

Notes to Financial Statements

Note 1 – Organization and Summary of Significant Accounting Policies

Organization – Northwest Power and Conservation Council (the Council) was established by the Pacific Northwest Electric Power Planning and Conservation Act (the Act), as enacted by Congress of the United States, on December 5, 1980.

The Council, which consists of two representatives from each of the four states of Oregon, Washington, Idaho, and Montana, is charged with developing a comprehensive long-range plan for meeting the electric energy needs of the four-state region. The Council is also specifically charged with establishing a program to protect and enhance the fishery resources of the Columbia River System, as well as balancing the energy needs and resources of the region with environmental considerations.

The Council has developed the Columbia River Basin Fish and Wildlife Program, which was originally adopted on November 15, 1982, and subsequently amended to include salmon recovery measures. The Council has also developed the Northwest Conservation and Electric Power Plan, which was originally adopted on April 27, 1983. The Council now directs its efforts to the implementation and revision of these programs at both the regional and state levels. The most recent revisions were adopted in 2014 for the Fish and Wildlife Program and in 2016 for the Seventh Northwest Electric Power and Conservation Plan.

As provided by the Act, the Bonneville Power Administration (Bonneville) pays compensation and other expenses of the Council for the performance of its functions and responsibilities relating to the Act. Bonneville is required to pay the Council for expenses not to exceed 0.02 mills per kilowatt-hour (kwh) of forecasted firm power sales for the year to be funded. However, funding may be increased up to 0.10 mills per kwh of forecasted firm power sales in any year upon a showing of need by the Council. Actual Council program expenses funded through Bonneville for the years ended September 30, 2018 and 2017 were \$11,146,149 and \$11,047,437, respectively. On a budgetary basis of accounting, which differs from the accrual method primarily by including capital outlay expenditures and excluding depreciation, expenses were \$11,100,650 with \$3,127,048 allocated for the operations of State Councils for the year ended September 30, 2018. Expenses were \$10,963,364 with \$3,083,544 allocated for the operations of State Councils for the year ended September 30, 2017.

Use of estimates – The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and cash equivalents – The Council considers all cash on hand, including restricted cash, and investments in money market funds with an original maturity date of three months or less, as cash and cash equivalents.

Northwest Power and Conservation Council

Notes to Financial Statements

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Restricted cash – Restricted cash represents the amount of funds received from outside sources that are restricted for specific projects as well as funds reserved for employee retirement plan obligations. Restricted cash balances generally cannot be used for any reason other than their intended purpose.

During 2017, the Council adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2016-18, *Statement of Cash Flows (topic 230) – Restricted Cash*. This guidance requires that a statement of cash flows explain the change during the year in the total cash and cash equivalents and amounts generally described as restricted cash and restricted cash equivalents when reconciling the beginning-of-year and end-of-year total amounts shown on the statement of cash flows. This update did not have a significant impact on the Council's financial statements.

Awards receivable – Awards receivable are reported at their outstanding principal amount. Awards receivable are considered by management to be fully collectible within one year and, accordingly, no allowance for doubtful accounts is considered necessary.

Property and equipment – The cost of property and equipment is being depreciated over the estimated useful lives of the assets using the straight-line method. Estimated useful lives range from three to five years. New equipment with costs exceeding \$1,500 is capitalized; expenditures for repairs and maintenance are expensed when incurred.

The cost of leasehold improvements are capitalized and amortized over the shorter of the term of the applicable leases or their estimated useful lives, which range from one to five years.

Deferred project revenue – Deferred project revenues represent funds received in the current fiscal year which relate to the following fiscal year's activities. The deferred balance is recognized as related program expenditures are incurred.

Deferred rent payable – The Council records lease expense over the lease term on a straight-line basis for leases with fixed escalation clauses. Accordingly, the Council recognizes deferred rent to the extent that the straight-line recognition of lease expense exceeds required lease rental payments. Deferred rents are reduced when lease payment requirements exceed the recognized amount of expense.

Professional service contracts – As provided by the Act, the Council contracts with independent third parties to conduct studies or provide specific services in conjunction with the development of long-range plans. Liabilities and expenses for contractual services are recognized when incurred.

Travel expenses – Travel expenses of individuals paid directly by the Council are subject to its travel regulations. Travel expenses of Council members paid directly by member states are also subject to Council travel regulations.

Northwest Power and Conservation Council

Notes to Financial Statements

Note 1 – Organization and Summary of Significant Accounting Policies (continued)

Income taxes – Under current federal and state income tax regulations, the Council is exempt from income taxes under a Federal Act of Congress and has no requirements to file exempt organization tax returns.

The Council follows generally accepted accounting principles related to uncertain tax positions. In this regard, and if applicable, the Council would recognize the tax benefit from uncertain tax positions only if it is more likely than not that the tax positions would be sustained upon examination by tax authorities, based on the technical merits of the position. The tax benefit measurement is based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. As of September 30, 2018 and 2017, the Council has not identified any uncertain tax positions requiring accrual or disclosure. The Council recognizes interest and penalties, if any, related to income tax matters in miscellaneous expenses. During the years ended September 30, 2018 and 2017, no interest or penalties were recognized.

Subsequent events – Subsequent events are events or transactions that occur after the statement of financial position date but before financial statements are available to be issued. The Council recognizes in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the statement of financial position, including the estimates inherent in the process of preparing the financial statements. The Council's financial statements do not recognize subsequent events that provide evidence about conditions that did not exist at the date of the statement of financial position but arose after the statement of financial position date and before financial statements are available to be issued. The Council has evaluated subsequent events through December 17, 2018, which is the date the financial statements were available to be issued.

Note 2 – Restricted Cash

Restricted cash balances consisted of the following as of September 30:

	<u>2018</u>	<u>2017</u>
Nature of restriction:		
Special projects funded by utilities	\$ 895,490	\$ 770,908
Council retirement funds	<u>376,427</u>	<u>361,702</u>
	<u>\$ 1,271,917</u>	<u>\$ 1,132,610</u>

Northwest Power and Conservation Council Notes to Financial Statements

Note 3 – Awards Receivable – Bonneville Power Administration Funding

The following represents awards receivable from Bonneville as of September 30:

	<u>2018</u>	<u>2017</u>
Council Programs	\$ 287,281	\$ 317,122
Regional Technical Forum Support	223,243	311,353
Independent Scientific Review Panel	86,975	29,020
Independent Scientific Advisory Board	<u>17,587</u>	<u>63,290</u>
Total awards receivable	<u>\$ 615,086</u>	<u>\$ 720,785</u>

Note 4 – Independent Scientific Review Panel

During 1997, Congress passed the Energy and Water Development Appropriations Act, which added an amendment to the Act. The amendment requires the Council to create an independent panel of scientists and peer review groups to examine projects proposed for funding by Bonneville. Funding for the panel is provided by Bonneville and is separate from the Council's operating budget. Expenses of the Independent Scientific Review Panel for the years ended September 30, 2018 and 2017 were \$244,038 and \$306,750, respectively.

Note 5 – Independent Scientific Advisory Board

In 1996, the Council and the National Oceanic and Atmospheric Administration (NOAA) Fisheries established the Independent Scientific Advisory Board (ISAB). The ISAB was formed to provide independent advice and recommendations regarding scientific issues posed by representative agencies on matters that relate to their fish and wildlife programs. In 2002, the Columbia River Basin Indian Tribes were added as equal partners in the sponsorship of the ISAB. For the years ended September 30, 2018 and 2017, ISAB expenses, which are supported through revenue from Bonneville, were \$279,541 and \$230,921, respectively.

Note 6 – Regional Technical Forum Support

The Regional Technical Forum Support (RTF) is an advisory committee established in 1999 to develop standards to verify and evaluate conservation savings. Members are appointed by the Council and include individuals experienced in conservation program planning, implementation, and evaluation. The RTF is also responsible for developing a conservation and renewable resources rate discount (C&RD) for Bonneville. The C&RD program awards rate discounts to customers who have implemented effective energy conservation measures.

Northwest Power and Conservation Council

Notes to Financial Statements

Note 6 – Regional Technical Forum Support (continued)

RTF projects include the assessment of potential energy efficiency technologies, measures, practices and renewable resources to determine their incremental costs, energy and capacity savings, reliability, and value to the region's bulk power system. RTF work is funded by Bonneville and other utilities and is performed by Council staff and contractors employed by the Council for specific analytical tasks. Expenses of the RTF for the years ended September 30, 2018 and 2017 were \$1,661,270 and \$1,613,600, respectively.

Note 7 – Commitments

The Council leases office space and various equipment under operating lease agreements. Future minimum lease payments under these leases for the year ending September 30, 2018 is as follows:

2019	\$ 493,131
2020	465,402
2021	455,424
2022	<u>92,898</u>
	<u>\$ 1,506,855</u>

Certain leases contain periodic escalation clauses. Total facilities and equipment rental expense, including short-term rentals, maintenance contracts, and leases of less than one year was \$471,503 and \$537,943 for the years ended September 30, 2018 and 2017, respectively.

Note 8 – Deferred Compensation Trust and Pension Plan

The Council has established a state and local government deferred compensation trust for its employees. The trust was established during 2000 to replace the structure of a previous deferred compensation plan. As a result of formation of the trust, all plan assets and related benefit obligations were removed from the books and records of the Council and placed with the trust. Under the deferred compensation trust, pursuant to Section 457 of the Internal Revenue Code, the Council has a contractual relationship with each employee participant to pay his or her deferred compensation balance upon termination. The Council did not contribute to this plan for the years ended September 30, 2018 or 2017. Employee salary deferrals not yet remitted to the plan, which are recorded within restricted cash and accrued employee benefits until distributed, were \$23,187 and \$15,935 for the years ended September 30, 2018 and 2017, respectively.

The Council also has a retirement plan and trust plan, which was adopted on December 31, 1987, under Code Section 401(a) of the Internal Revenue Code. All Council contributions to the retirement plan are held in a trust for the benefit of employee participants. During the years ended September 30, 2018 and 2017, the Council made contributions of \$931,497 and \$903,203, respectively, to this plan.

Northwest Power and Conservation Council

Notes to Financial Statements

Note 8 – Deferred Compensation Trust and Pension Plan (continued)

The Council's contributions recognize the fact that the Council does not participate or contribute to FICA and, therefore, employees do not receive benefits under the Federal Social Security system. Contributions on behalf of employees not yet remitted to the plan, which are recorded within restricted cash and accrued employee benefits until distributed, were \$302,967 and \$296,475 for the years ended September 30, 2018 and 2017, respectively.

Note 9 – Concentrations of Credit Risk

Financial instruments that potentially subject the Council to concentrations of credit risk consist principally of cash and cash equivalents. The Council places substantially all of its cash and cash equivalents with federally insured financial institutions; however, cash balances may periodically exceed federally insured limits. As of September 30, 2018 and 2017, management considers the Council to have no undue concentration of credit risk resulting from its cash management and banking practices.

As discussed in Note 1, the Council was established on December 5, 1980 by the Pacific Northwest Electric Power Planning and Conservation Act (the Act), as enacted by the Congress of the United States. The Council receives essentially all of its revenues from the Bonneville Power Administration. Should Bonneville Power Administration cease to exist or discontinue funding the Council for any reason, the Council's source of funding would be uncertain.

Supplementary Information

Report of Independent Auditors on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

To the Council Members
Northwest Power and Conservation Council

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of Northwest Power and Conservation Council (the Council), which comprise the statement of financial position as of September 30, 2018, and the related statements of activities and cash flows for the year then ended, and the related notes to the financial statements, and have issued our report thereon dated December 17, 2018.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Council's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Council's internal control. Accordingly, we do not express an opinion on the effectiveness of the Council's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the Council's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Council's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Council's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Moss Adams LLP

Portland, Oregon
December 17, 2018

Report of Independent Auditors on Compliance for the Major Federal Program and Report on Internal Control Over Compliance Required by the Uniform Guidance

To the Council Members
Northwest Power and Conservation Council

Report on Compliance for the Major Federal Program

We have audited Northwest Power and Conservation Council's (the Council) compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on the Council's major federal program for the year ended September 30, 2018. The Council's major federal program is identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal program.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for the Council's major federal program based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of Title 2 U.S. *Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Council's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for the major federal program. However, our audit does not provide a legal determination of the Council's compliance.

Opinion on the Major Federal Program

In our opinion, the Council complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on its major federal program for the year ended September 30, 2018.

Report on Internal Control over Compliance

Management of the Council is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Council's internal control over compliance with the types of requirements that could have a direct and material effect on the major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for the major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Council's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. *A significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Summary Schedule of Prior Year Findings
Year Ended September 30, 2018

FINDING 2017-001 – Procurement and Suspension and Debarment – Significant Deficiency in Internal Control Over Compliance

<i>CFDA Number(s)</i>	<i>Program Name/Title</i>	<i>Federal Agency/ Pass-through Entity</i>	<i>Federal Award Number</i>	<i>Award Year</i>
81.U01	Independent Scientific Advisory Board	U.S. Department of Energy/Bonneville Power Administration	00073869	2016-17
81.U01	Independent Scientific Review Panel	U.S. Department of Energy/Bonneville Power Administration	00073870	2016-17

Criteria or specific requirement: Non-federal entities are prohibited from contracting with or making subawards under covered transactions to parties that are suspended or debarred or whose principals are suspended or debarred.

Condition: The Council did not have adequate internal control procedures in place to appropriately monitor compliance with the federal suspension and debarment requirements for contracts.

Questioned costs: None.

Context: Of all vendors we tested, we noted the Council had not conducted a search to determine if the vendor was suspended or debarred prior to entering into a contract. Additionally, of all contracts reviewed, none included the required certification language. Of all vendors tested, we noted none were suspended or debarred.

Effect: The Council could contract with parties that have been suspended or debarred.

Cause: The Council did not have adequate internal control procedures in place to appropriately monitor compliance with the federal suspension and debarment requirements for contracts.

Recommendation: We recommended the Council implement procedures to ensure compliance with this regulation as it relates to Federal programs.

Current Status: Resolved.

Northwest Power and Conservation Council

Notes to Schedule of Expenditures of Federal Awards

Year Ended September 30, 2017

Note 1 – Basis of Presentation

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal grant activity of Northwest Power & Conservation Council (the Council) under programs of the federal government for the year ended September 30, 2018. The information in this Schedule is presented in accordance with the requirements of Title 2 U.S. *Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the Council, it is not intended to and does not present the financial position, changes in fund balance or cash flows of the Council.

Note 2 – Summary of Significant Accounting Policies

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Negative amounts shown on the schedule, if any, represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years. Pass-through entity identifying numbers are presented where available.

Note 3 – Indirect Cost Rate

The Council has elected not to use the 10-percent de minimis indirect cost rate allowed under the Uniform Guidance.
