Turner Energy Storage Project Operational Characteristics

- Flow Battery Energy Storage Systems (FBESS) performance depends on various factors
 - Operating mode – charge or discharge
 - Power
 - State of charge (SOC)
 - State of health
 - Operating temperature
- FBESS rating can be confusing
 - 1MW, 3.2 MWh is Uni Energy FBESS rating
 - However, at 1 MW, the energy obtained is ~ 2 MWh
 - To obtain the rated 3.2 MWh energy, the discharge power is 520 kW.
- Need to predict battery performance at various SOC's under different operating conditions
 - Battery SOC calculated by accounting for efficiency losses during charge and discharge
