Subject: Aluminum Plant Power

It would seem that no one is willing to build new plants or dams with cheap power. Until the government completely clears the way to build, it seems we must go their other way.

Kaiser in Tacoma just closed & sold their plant in Tacoma.

It is sad to say that the other plants relying on cheap power must do the same.

When the public is paying .085 per kwh, there is no longer cheap power available.

Sincerely

Harry Brunsdon
