OKANOGAN RIVER WATERSHED MAP 1

WASHINGTON STATE, U.S.
AND
BRITISH COLUMBIA, CANADA

LEGEND

- Selected Cities
- Streams and Rivers
- - - U.S. - Canadian Border
- Open Water
- Canadian Portion of the Okanogan River Watershed
- U.S. Portion of the Okanogan River Watershed
- Areas Outside the Okanogan River Watershed Included in the Study

SOURCES: The information shown on this map was compiled from both USDA NRCS and British Columbia Ministry of Environment, Lands and Parks GIS datasets. The watershed boundary depicted on the U.S. side is a combination of modified U.S. Forest Service 1:24,000 digital basin boundaries, NRCS Omak Creek and Sanpoil River 1:24,000 digital watershed boundaries, and boundaries compiled and digitized on the Omak, Oroville, and Robinson Mountain 1:100,000 scale USGS topographic quadrangles. Various 1:24,000 USGS topographic quadrangles were consulted to help determine hydrologic boundaries. Streams and open water data on the U.S. side were extracted from the Okanogan County 1:100,000 scale Tiger95 dataset. The watershed boundary, open water, and stream network depicted on the Canadian side are from the British Columbia Watershed Atlas. These datasets were digitized from the Canadian 1:50,000 NTS map series in 1997.
