During the Quality Control/Quality Assurance phase of document review, several references were found to be improperly cited or improperly used (i.e., secondary references or missing information). Thus, an exhaustive review of the subbasin plan and the following reference section will turn up a small number of missing citations. These are available upon request from the subbasin coordinators, but have not been reconciled for accuracy.

Attached is an excerpted list of relevant references from Hillman et al., 2004. Since this list contains many links to key documents and hosts a wealth of applicable citations, the Methow subbasin planners have appended this to the guidance to access this useful information.

Note: Methow Sub-basin references from submitted supporting documents to lead writer that were cited but were either missing or not properly cited

We have begun in identifying the section of the Methow subbasin plan to begin identifying which supporting documents may have or require modification to find or modify citations.
